# 50% LONGER LIFESPAN
UNDER REAL CONDITIONS

APPROVED 2019 DLG WWW.DLG.ORG

VREDESTEIN TRAXION XXL
✓ Wear behaviour under real conditions
DLG Test Report 7026

As a result of rising transport tasks on the road, the cost factor of tyres becomes more and more important. Recent testing by the independent German test institute DLG has confirmed Vredestein Traxion tyres to be a far more economical option than competitor tractor tyres over their lifetime. In fact, the results proved that the Vredestein Traxion XXL has a 50% longer lifespan, which ultimately results in a saving of 1 euro per operational hour per tractor.

READ MORE ON
WWW.VREDESTEIN.CO.UK/MOREHOURS

TRAXION XXL

**We are proud to still be supporting farmers throughout these tough times, we are operating our on farm breakdown and fitting service as normal to keep you moving. Tyre availability is still very good, stay safe and give us a call if needed**

# BUILT FOR GENERATIONS.

The 2017 launch of the new MF Round Baler range saw the established design of Lely Welger integrated into the Massey Ferguson family, encompassing features which make these the most reliable and high performing range of baler models on the market.

Tailored to your specific needs; producing high density hay, silage or straw bales, they remain simple, easy to set up and adjust.

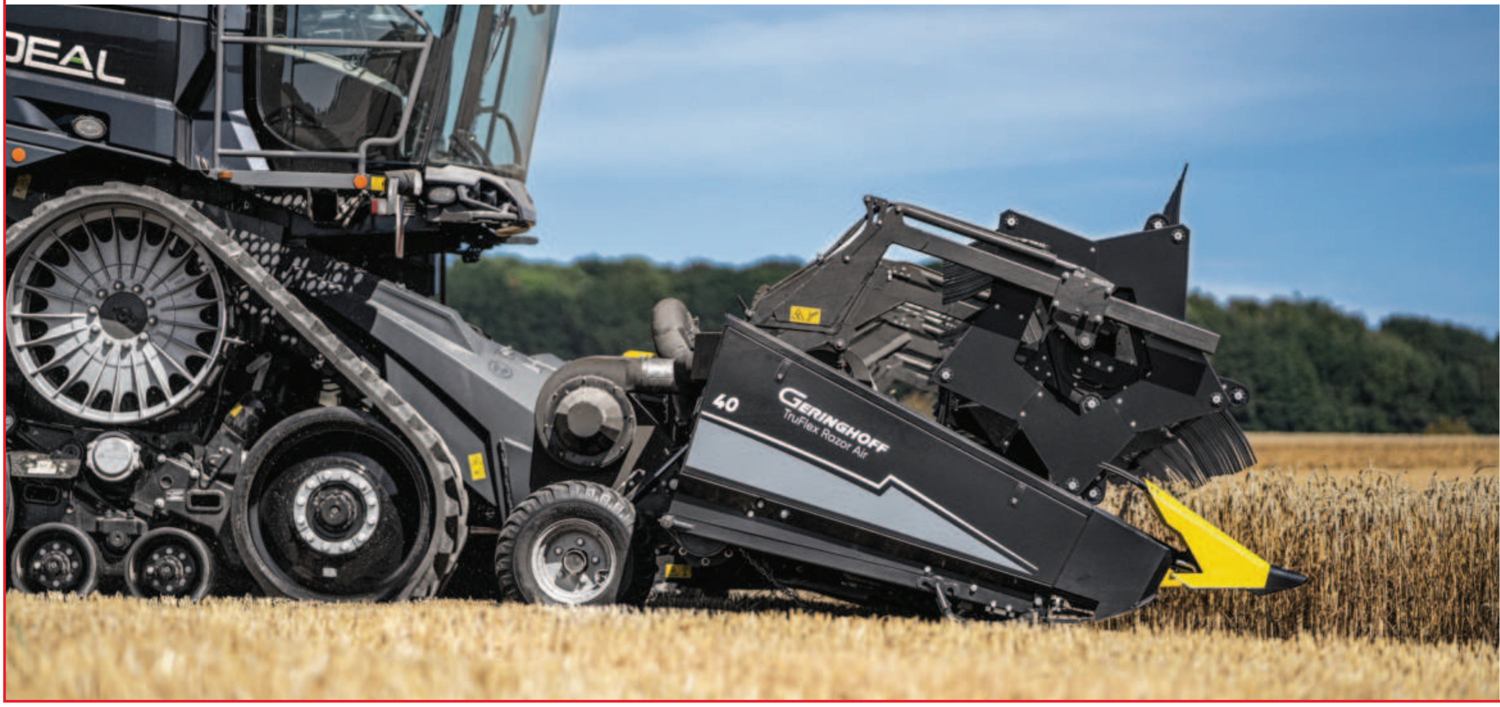
# SPECIAL HEADERS INCLUDED IN RANGE

**As demand for specialist combine harvester headers has increased in recent years, Fendt is now expanding its range to include special headers from Geringhoff. To this end, a long-term partnership was recently agreed between the agricultural equipment manufacturer AGCO/ Fendt and Carl Geringhoff Vertriebsgesellschaft mbH & Co. KG, based in Ahlen, Westphalia, Germany.**

Geringhoff is known worldwide as a premium manufacturer of draper headers, corn pickers, headers for special crops and folding headers – a perfect complement to Fendt units. Geringhoff's products include draper headers with flexible cutterbars. With a split frame and reel for the best ground adaptation, and an optional flexible cutterbar for the lowest pickup losses in stalk and bean cutting. These units adapt perfectly to the ground contour. Fendt customers will also be able to use headers with a working width of up to 13.70m with their Fendt combine harvester in the future. Geringhoff also provides special sunflower and millet heads. The existing range of Fendt headers – FreeFlow, PowerFlow and CornFlow – is still available.

"Geringhoff is known worldwide as a pioneer in professional headers and attachments for maximum harvesting speeds at the lowest pickup losses. These headers are an excellent complement to our existing range, and we can now provide solutions for all our customers", says Christoph Gröblinghoff, Chairman of the AGCO/Fendt Management Board, referring to the collaboration with Geringhoff.



# NEW DATE FOR FARM EXPO 2021

**The South East's first agricultural trade show of the year is set to return in 2021, with a later date aimed at avoiding the impact of the Covid-19 pandemic restrictions.**

Backed by *South East Farmer*, Farm Expo will return for a third year on Wednesday 21 April at the Kent Showground, where last year more than 110 trade stands were visited by 2,500 visitors.

The Kent County Agricultural Society (KCAS), the team behind Farm Expo, has said it is looking to build on the success of the previous two years to bring a more diverse offering for the South East's farming community.

KCAS Chairman James Forknall, said: "Farm Expo has become a key date in the diary for farmers and we knew we wanted to return for 2021, despite the pressures of the current pandemic. It is important that the industry continues to have a platform to see and discuss the latest developments and issues.

"The team behind Farm Expo has been working hard to find ways to run Farm Expo this year in a safe manner without compromising the value the event offers." Plans include wider aisles, one-way systems and enough flexibility to make sure it can follow any restrictions in force at the time.

# INNOVATIVE TYRE FOR COMPACT TRACTORS

**An innovative tyre for compact tractors and suitable for any job on the farm has been released to the UK and European agricultural market.**

Goodyear Farm Tires has taken the wraps off its R14T, a hybrid of agriculture, turf and industrial tread patterns. The R14 is designed to provide maximum performance in all conditions and will be available in 17 different sizes with radial and bias options.

The R14 is a versatile, crossover tyre for multi-application tractors which delivers outstanding performance, whatever the conditions.

Combining the three different designs means that farmers no longer have to change their tyres for different applications – it is as comfortable operating out on the open road as it is in the field."

The R14 builds on the existing Goodyear Farm Tires' Optitrac R-1 agricultural tread which provides outstanding traction and clean-out, resulting in a longer-life tyre.

Features of the R-4 all-purpose industrial tyre designs – including strong durability, wear and hard surface performance – are also key components of the design of the R14, which also includes a high lug-to-void ratio, making it perfect for turf and hard surface applications.

A distinctive centreline also delivers exceptional stability and road performance.

# VERSATILE SERIES

**Massey Ferguson has announced the introduction of five new models from 105hp to 145hp in the MF 5S Series, which continues its striking new era design and enhanced operator experience introduced on the advanced, new MF 8S Series.**

With best in class visibility and industry-leading 4m turning radius, the narrowest steep-nosed bonnet and practical features they are supreme loader tractors. Also, their greater payload and higher linkage capacity make them powerful performers in the field and on the road.

All models are equipped with four-cylinder engines, offering maximum powers from 105hp up to a new range topping 145hp model. There is a choice of three levels of specification – Essential, Efficient and Exclusive, plus a range of options including outstanding control from the latest state-of-the-art, easy to use Smart Farming technology.

With its compact dimensions, 2.55m wheelbase, superb visibility, high hydraulic flow and control, the MF 5S further builds on Massey Ferguson's renowned reputation as the leading loader specialist. All models can be supplied loader ready, or now come equipped with a factory-fitted loader from the Massey Ferguson MF FL Series.

For arable and mixed farming operations MF 5S tractors offer a host of output enhancing features. Rear linkage lift capacity is increased to 5,700kg across the range, and up to 6,000kg in some specific circumstances, while the new, stronger front linkage capacity is increased from 2,500kg to an impressive 3,000kg. Coupled with a higher, 9,500kg Gross Vehicle Weight (GVW), this allows the tractors to safely handle wider implements to improve workrates.

Latest Smart Farming technology further improves output and efficiency with easy to use precision farming features, including MF Connect telemetry, MF Guide auto-steering, MF Section Control and MF Rate Control.

## CHOOSE THE SPECIFICATION TO SUIT ALL TASKS

All five MF 5S Series tractors are available with the choice of Essential, Efficient or Exclusive specifications. These packages include a range of performance and comfort enhancing features to suit a range of applications. Typical equipment variations include hydraulic pump output, spool valve control, AutoDrive, joystick controls and cab suspension.

Exclusive models are 'fully loaded' including, among other options, 110 litre/min hydraulics with up to eight electric spool valves, hydraulic joystick, Multipad control, AutoDrive transmission, auto air-con, cab suspension, Superluxe air suspended seat and Datatronic 5 touch-screen terminal.

Efficient specification is similar, but has two electric and two mechanical spools at the rear, standard air-con and an air-suspended seat, while the Datatronic 5 terminal becomes an option.

Essential models switch to using a T-lever gear control in place of the Multipad, with the hydraulic joystick an option and AutoDrive replaced by Speedmatching on the Dyna-4 transmission. It has a 58 litre/min hydraulic pump and two rear mechanical spool valves – up to four as an option.

## RENOWNED LOADER SPECIALIST

The new MF 5S Series tractors are supreme loader tractors – offering industry-leading manoeuvrability, excellent visibility over the slim, steep nosed bonnet and efficient high-flow hydraulics. Loading operations are made much easier using the excellent transmission controls as well as Brake-to-Neutral and joystick. Visio roof options also provide a clear view of the attachment through the whole lifting range.

As well as being supplied 'loader ready', the MF 5S is available complete with a factory-fitted loader. A new quick coupler now connects both the hydraulics and electrics together, which eases attaching and removing the loader in the farm yard or field.

Massey Ferguson not only supplies a wide range of parallel and non-parallel lifting loaders in its MF FL range, these can also be supplied factory fitted to the MF 5S. This useful option includes a sub-frame, dedicated pipework and mechanical or electronic joysticks to fully integrate the loader into the tractor.

## COOLER MORE COMFORTABLE CAB

All MF 5S Series models are equipped with a high specification cab, which keeps operators in optimum comfort. A new HVAC air system enhances air distribution, enabling operators to not only set and maintain the most comfortable temperature, but it also reduces demisting and defrosting times.

On Exclusive and Efficient tractors a new armrest, as used in the recently launched flagship MF 8S range, houses the Multipad joystick. This provides control of a number of functions including forward/reverse shuttle, linkage and spool valves.

The Multipad can also be equipped with a micro joystick to operate two rear spool valves (or any other spool valve when Datatronic 5 is fitted). Loaders are operated by a separate joystick that sits alongside the Multipad. While on tractors with Datatronic 5, the screen is placed conveniently to the right of the console.

Essential tractors come with a shorter armrest, with the transmission operated by a small T-lever to the side and separate levers for the spool valves. On loader tractors the joystick is mounted at the front of the armrest.

## POWER WITH ECONOMY

Latest AGCO Power 4.4 litre, four cylinder engines meet Stage V emissions regulations with straightforward MF All-in-One technology. This elegant answer is designed for the tractor's lifetime, helping to cut maintenance costs.

Developed by AGCO Power, it contains the SCR system, DOC and soot catalyst in one compact unit, all neatly housed under the cab, maintaining the industry-leading forward visibility over the low, slim bonnet.

Longer service intervals now extend oil and fuel filter changes to 600hr, which further helps reduce running costs.

A new, optimised airflow system improves engine cooling, which increases performance and efficiency.

## RENOWNED, RELIABLE TRANSMISSIONS

All MF 5S Series tractors are available with a choice of Massey Ferguson's highly regarded 16x16 speed, Dyna-4 or 24x24 Dyna-6, semi-powershift transmissions. Highly efficient and easy to use, both come with the useful Brake-to-Neutral function.

On Exclusive and Efficient models the transmissions come with AutoDrive as standard and are controlled via the Multipad joystick. AutoDrive provides automatic changing of the four or six steps in fieldwork, as well as the ranges when in transport

Essential versions with Dyna-4 have T-Lever transmission control with Speedmatching, which automatically selects the most appropriate powershift ratio for the speed when gears are changed. Dyna-6 models come with AutoDrive.

Creeper gears are an option on all models, offering speeds down to 70m/hr with 34" tyres or 80m/hr on 38" tyres.

## STRONG SUSPENDED FRONT AXLE

A new, stronger suspended front axle offers an industry-leading 4m turning radius. Working with the new 3t capacity front linkage, which can now lift an extra 500kg, it helps improve efficiency, enabling the tractors to use larger front-mounted equipment.

Extra comfort is offered by the electronically-controlled hydraulic suspension, which uses two longer stroke cylinders and three accumulators to absorb shocks.

## STRONG LINKAGE

Redesigned to handle heavier loads, three-point linkage lift capacity is increased to 5,700kg – 7% more than its predecessor. In certain circumstances it can lift up to 6,000kg. The linkage is constructed from new components to provide more strength and mounting flexibility. A hydraulic hook top link is now an option.

Developed for mounting with the new suspended axle, the latest front linkage is an integrated design that helps maintain the industry-leading 4m turning radius. With capacity increased from 2,500kg up to 3,000kg, this enables operators to improve efficiency by carrying out two operations at the same time with larger, wider implements.

The linkage comes with an updated Front Pack installation, which includes two spool valves as standard, with the option of up to four. In response to customer demand the linkage is now also available without front couplers or with two, electrically operated front couplers. All versions are controlled with the same joystick lever in the cab.

## TOUCH-SCREEN CONTROL

MF Connect telemetry is an option on all MF 5S Series, allowing users to monitor their entire machinery fleet, showing the machines' current positions, routes travelled as well as a range of operating information.

Datatronic 5 offers intuitive operation and is standard on Exclusive models and an option on others. This ISOBUS compatible touch-screen operator information station monitors all the tractor functions and controls any ISOBUS compliant implement.

All the elements in the MF Technologies/Smart Farming Suite run through Datatronic 5. These include MF Guide automatic steering, as well as MF Section Control and MF Rate Control, which can now handle up to 36 sections and five products.

Datatronic 5 is pre-installed with MF TaskDoc software to create field records, as applied maps, log fuel use, make job reports as well as keep an accurate account of all inputs to every hectare.

Further easing operations is MF TaskDoc Pro that enables this data to be transferred, via Agrirouter, to the user's farm management software or Next Machinery Management. Alternatively these functions can also be controlled on an optional Fieldstar 5 touch-screen terminal.

## BETTER BY DESIGN

With the introduction of the MF 5S, Massey Ferguson continues its striking new era design first seen on the advanced, new MF 8S Series, following the same 'neo-retro' livery with modern headlights and LED signature. This design pays tribute to the brand's heritage, incorporating an interpretation of the iconic MF grey sabre stripe on the side and horse head collar motif on the bonnet, which dates back to the MF 100 series.

# KEEP ROAD USERS SAFE WITH ROAD-LEGAL LIGHTS ONLY

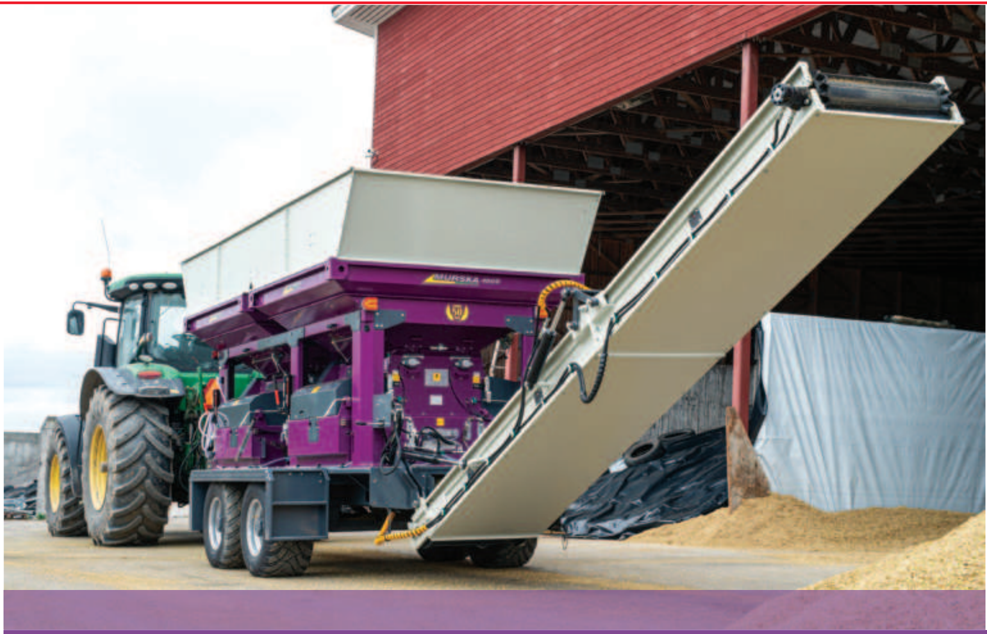
**UTV Products is highlighting the use of road-legal lights only when driving agricultural machinery on the highway. The use of high-power working lights can blind other motorists, creating dangerous driving situations for all involved.**

"Operators travelling on road are often tempted to use all available white lights front and rear when undertaking night-time road movements. The mass of bright white light on tractors at night gives no indication what is behind a machine or how wide it actually is because motorists eyes are drawn to the lights and blinded," explains Martin Wickes, managing director at UTV Products.

Mr Wickes highlights that it is illegal to show white lights to the rear, but drivers may believe their use helps. "A high percentage of tractors and telehandlers in daily use have poor headlights and this alone can prompt the unnecessary use of bright work lights to compensate."

Modern UTV road legal lights provide maximum illumination close to the vehicle as well as at greater distance and can be fitted to new and older machines. "Decent lights cost little in relation to accidents and potential loss of lives caused by the above scenario. In many instances, great performing headlights are a good dual-purpose investment because they improve both field and highway use when working around the clock," adds Martin.

Unpredictable weather and challenging seasons mean working through the night when field and crop conditions allow. Using crisp, clean lighting akin to daylight becomes ever more important when working around the clock and front headlights are a great place to begin when upgrading light packages.



# LAUNCH OF LARGE-SCALE MACHINE FOR ROLLING DRY OR MOIST GRAIN

**A new machine launched by feed preservation specialists, Kelvin Cave Ltd, is thought to be the largest roller mill on the UK and Irish market. The Murska 4000 rolls dry or moist grain at a rate of up to 100 tonnes/hour (for maize) or 80t/hour (for crimped, moist cereals).**

This high-volume throughput makes the Murska 4000 suitable for large-scale farming operators including contractors or animal feed blending plants.

Its four pairs of metre-long rollers with their 2mm-fluted, hardened surface enable the machine to roll or crimp a wide range of grains and pulses. This ranges from completely dry cereals and maize to grains with moisture contents of up to 45%.

High moisture grains or pulses requiring additives can be treated as the grain is processed, with preservatives such as Crimpsafe or Propcorn NC, if an applicator is fitted. Similarly, applicators can also add feed supplements such as minerals, at the time of processing.

The Murska 4000's robust belt conveyer gives the machine extended reach into grain stores, clamps of crimp, or lorries. Its modular design also means it can be expanded with an additional unit, should an even higher capacity be required.

Designed and manufactured in Finland, the Murska 4000 joins an existing range of rollers and crimpers which cater for all sizes of operator. These range from the small farm which processes feed for its own livestock to large AD plants using crimp as feedstock. All models run from a tractor's PTO or some smaller models have the option of a three-phase electric motor.

# ENGINE COLLABORATION

**John Deere Power Systems and DEUTZ have announced plans to jointly develop and source components for a low horsepower range engine up to 130kW. Working together, the parties will be able to close a gap in the market by developing an engine that provides customers additional and exceptional value upon initial purchase while retaining the reliability, versatility and performance they've come to expect from John Deere and Deutz engines.**

John Deere and Deutz bring different perspectives and capabilities to the table and, through this collaboration, the two companies can broaden their supply base and benefit from global scale – ultimately translating to increased market and customer value. The co-development and co-sourcing scope includes engine hardware and design, from which each company will customise its product to meet customers' specific needs through engine software and controls. Engine manufacturing and distribution will be done independently by John Deere and Deutz.

"John Deere and Deutz are both industry leaders in designing and manufacturing innovative power systems," said Pierre Guyot, senior vice-president, John Deere Power Systems. "Through combining our complementary knowledge sets and focus areas, we are excited to offer John Deere and Deutz customers a reliable, cost-effective engine option in the low horsepower range."

Deutz CEO Frank Hiller stated, "The fact that John Deere chose Deutz as a collaborator for this engine project underlines our strong position in off-road engine applications. This collaboration is an important step in establishing a business relationship between the two companies. We are very excited about the opportunity to join forces with an industry leader like John Deere, thereby creating value for our customers."

# MORE MECHANICAL WEED CONTROL OPTIONS

**OPICO has widened its mechanical weed control line-up to include a new range of inter-row and intra-row hoes.**

Joining Hatzenbichler comb harrows and hoes, German-built KULT machines add to the Bourne-based company's offering with specialist cultivators designed for high-value vegetable and salad crops. In addition, the firm's steerable headstocks provide a simpler, lighter, lower-cost option for implements with narrower working widths.

KULT's inter-row hoes can be equipped with a wide range of working tools from A-shares to L-blades with tines positioned to suit the narrowest 10cm spacings in wheat to row crops like pumpkins set up to 1m apart.

While dealing with weeds between the rows of any crop is critical in maximising yield, in these high-value specialist crops it's equally important to manage those in amongst the rows of plants. That's where KULT's innovative intra-row finger weeder comes in.

A much simpler approach than other solutions on the market, pairs of plastic tined wheels either side of the row work in tandem to pluck weed seedlings out from between the crop plants. This intra-row weed control option is also available on Hatzenbichler's line-up of inter-row hoes.

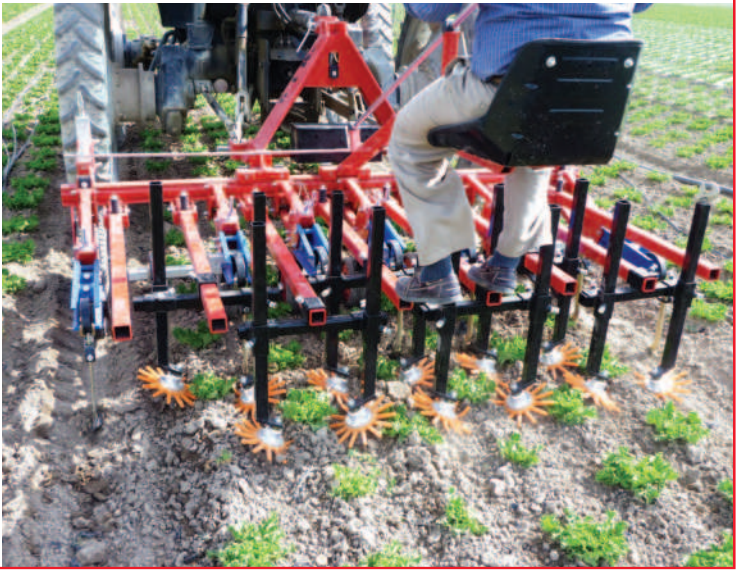
"With its success firmly rooted in the vegetable industry, KULT's philosophy is very much about building bespoke machines to suit the customers' requirements," explains OPICO managing director James Woolway.

"Its weeders can be made to suit any bed size or working width and can be equipped with a wide range of tools to deal with different crops, soil types and weeds. That concept of configuring bespoke machines is exactly how we at OPICO are handling our mechanical weed control offering here in the UK. Our product specialists will work with growers to build exactly the right specification implement for the job."

To that end, there is a range of options for the KULT's steerable toolbars. At the most basic level customers can opt for manual guidance with an operator seated on the frame steering the unit either mechanically or hydraulically. This is often chosen where there is less of an emphasis on covering the ground at high speed.

Moving to the next level of automation, growers can opt for camera guidance. Like Hatzenbichler machines, KULT weeders employ the British-made Tillett and Hague system. These camera-guided machines work closer to the crop and hence provide improved weed control at higher work rates.

While Hatzenbichler comb harrows and inter-row hoes provide herbicide-free weed control options for broadacre crops, the KULT line-up is a bespoke offering to cater for a wide-range of specialist crops.



# COMPLETE LINE OF NEXT GENERATION MACHINES

**Doosan Infracore Europe has launched the company's new 'DL-7' wheel loader range, introducing a complete line of next generation machines with an award-winning design, driven by powerful new Stage V compliant engines and providing higher productivity, increased fuel efficiency and a low cost of ownership, coupled with a fantastic environment and experience for the operator.**

In this first phase of the DL-7 range introduction, seven new models are being launched – the DL280-7, DL320-7, DL380-7, DL420-7, DL480-7, DL550-7 and DL580-7, with four more models – the DL200-7, DL220-7, DL250-7 and DL420CVT-7 being added in 2021.

The new DL-7 range is the culmination of the first complete redesign of the Doosan wheel loader range in 10 years, with the exterior design, in particular, undergoing a complete transformation. The new external design has been applied to all models in the DL-7 series as a family look, creating a three-dimensional effect with an innovative cover shape and a vibrant, dynamic image for the range.

Redesigned buckets offering up to 7% more capacity ensure the seven new Doosan DL-7 wheel loaders provide easier and faster loading with maximum bucket capacities from 2.8 to 6.4m$^3$. This provides increased productivity for a very wide range of material handling applications.

Doosan is also offering a wider choice of options to provide more work tools for a better match with applications, further increasing output.

The Z-kinematic lift arm delivers high breakout forces and lifting capacities, especially for heavy materials, and a large dump angle for efficiently unloading sticky materials. An optional high lift arm is available where higher dump heights and increased versatility are required.

The DL-7 loaders also have smooth and responsive hydraulics and auxiliary hydraulic connections. All of the new DL-7 wheel loaders are equipped as standard with a 3rd spool valve with settable flow and detent function, providing a constant flow for hydraulically driven attachments. Operators can easily and comfortably control hydraulic attachments via the proportional switch on the joystick. Various bias and radial tyre options are also available from leading global manufacturers, to cover the widest possible range of conditions and applications.

In addition, the new wheel loaders can be ordered with a choice of different counterweight – options include 300, 400 or 500 kg depending on the application.

The LIS (Load Isolation System) provides a smoother ride and higher comfort for the operator, as well as higher productivity due to improved stability when the wheel loader is moving. The lift arm is cushioned by a hydro-pneumatic accumulator linked to the lift hydraulic system, acting as a shock absorber. The benefits include reduced cycle times, higher performance and better fuel efficiency while carrying out load and carry applications.

With automatic 5-speed powershift transmission, heavy duty HDL axles as standard and enhanced traction with Differential Hydraulic Lock (DHL), the DL-7 wheel loaders operate exceptionally, especially in high-load environments. The differential hydraulic 100% lock can be engaged at full torque automatically without any action from the operator.

Improvements have been made throughout the powertrain, to provide operators with best-in-class driveability and faster driving, reaching the 40 km/h maximum speed quickly and safely.

# NEW PREMIUM PLUS SUPER TANKER RANGE

**Northern Ireland agricultural machinery manufacturer SlurryKat has introduced an all new range of its Premium Plus Super Tankers. Based on the original range the new tankers now come with a host of new features included in the standard specification.**

SlurryKat's Premium Plus Super Tanker range includes models with capacities right through from 7,250 litres (1600 gallons) to 25,000 litres (5,500 gallons).

As SlurryKat CEO Garth Cairns explains, the new range of Super Tankers combine all the latest features introduced over the past 12 months together in the latest machines.

Garth said: "During the past 12 months you may have seen some new novel features on our tankers that we have been slowly introducing since the autumn of 2019. Having been encouraged by the customer response to these new features we have now unveiled the new range of Premium Plus Super Tankers that incorporate all the new features.

"These features have all been refined to the exact requirements our customers are demanding and we are rolling them out as standard base specification on all SlurryKat Premium Plus Tankers from December 2020," he said.

In addition to lighter booms, new braking system and new drawbar the new features also include a new pump.

The full list of features on the new range are:

- Five-point rear linkage system for all dribble bars and trailing shoes to be fitted to all models without any alterations
- High-speed vacuum pumps c/w crash protection system and auto vein lubrication.
- 150mm HD square beam axles 420x180 S Cam brakes on all models
- Automatic slack adjustment brakes on all models as standard
- Over hedge boom (46% lighter)
- Design laser press formed chassis
- Internal anti-surge smooth ride baffle system
- Increased size over flow valve system for more air flow and faster filling
- Load sensing braking system as standard
- Paint coat system for even longer life and high gloss shine
- Fill points connections for high speed filling
- Auto fill system for 10m$^3$ per minute filling speed
- Dribble discharge system at rear for faster, maintenance free application
- Rear 3 & 4 point linkage for all spreading equipment
- Flushable sight tube level indicator c/w tap as standard on all models
- Spring drawbar for an even smoother ride

# GATE AUTOMATION CAN BE FOR ANY GATE, IN ANY PLACE

**Remote access specialist Solar Gate Systems says that improvements in solar panel technology have created opportunities to install gate automation on any gate up to 7m wide, in any location.**

"We have the technology to successfully automate any existing gate, in any outdoor location," explains Mike Yeats, managing director of Oxfordshire based Solar Gate Systems. "As long as the gate swings freely, we can put solar power to it, and make its operation fully automatic."

"We are confident of harnessing, storing and converting more than enough power to run our solar gate mechanisms all year round," says Mike. "Our brushless motors are designed to make 1,000 openings every day. And because our gates can operate successfully in the depths of winter, the longer, brighter days are then very easy to manage."

With the recent rise in thefts, particularly with GPS precision farming equipment being taken from tractors and machinery, he says now more than ever, farms need to keep their gates firmly closed.

"An open gate is an invitation," he says. "But with our automated gate mechanisms, we can very easily turn an opportunity into a deterrent. Add to that our Goliath auto-lock – which fails closed should the power feed be cut – and we can provide any rural business with a very secure solution."

The firm has over seven years' experience of installing proven solar-powered gate automation systems to many farm drives and remote property entrances around the UK, where mains powered installations are simply too cost-prohibitive to install.

All equipment supplied and installed by Solar Gate Systems carries a two-year warranty, and where mains power is already available, the firm can also provide hard-wired solutions.

# HYDRAULIC FOLDING EXTENDS RANGE

**Kverneland's Enduro compact tine cultivator range has been extended with the addition of hydraulic folding models that accompany existing 3m and 3.5m fixed-frame versions.**

Available in Enduro and Enduro Pro specifications, an all-new folding frame design is offered in 4m, 4.5m and 5m working widths, with all folding models gaining an 'F' suffix. Using a two-piece frame that folds vertically through the centre-line of the implement, these models achieve an overall transport width of 2.85m.

All Enduro models use three rows of tines, with folding models achieving a 270mm tine spacing to encourage soil mixing and incorporation of residues. Tine choices include Triflex auto-reset tines with 700kg of release force, or shear-bolt protection versions. Triflex tines also feature a dual working angle, for controlled soil movement, creating deep loosening and shallow mixing capability in one operation.

Where the Enduro Pro offers on-the-move hydraulic adjustment for working depth, and includes a parallelogram linkage to maintain machine attitude when the depth is adjusted, the lighter Enduro is manually adjusted with spacers on its hydraulic depth cylinders.

Both are able to work from shallow to deep but while the Enduro can operate from 5-30cm deep, the Enduro Pro can run deeper, to a maximum working depth of 35cm. The linkage-mounted 4m Enduro F is priced from £20,093, with the 4m Enduro Pro F priced from £21,639.

# OPTIMISING TRACTOR-IMPLEMENT COMBINATIONS

**In a comprehensive test conducted by the German Agricultural Society (DLG), the Claas dialogue system CEMOS for Tractors impressively demonstrated its superior ability to increase overall efficiency. An optimisation potential of up to 21% was recorded for cultivation work – on a sustained basis.**

Ten experienced drivers from Germany, France, Poland and Denmark gathered on a large farm in Saxony-Anhalt to pit themselves against the optimisation potential of the dialogue-based operator assistance system CEMOS for Tractors. Test engineers from the DLG Test Centre Machinery and Farm Inputs were on hand to measure the ground speed and fuel consumption of all the test variants.

Using mounted cultivators, the operators shallow and deep-cultivated the strips of slightly and very loamy sand on the test plots over a three-day period. In the first part of the test, the operators had the chance to adjust relevant settings such as front ballast, wheel weights, tyre pressure and engine droop on the two Claas Axion 870 CMATIC tractors as they saw fit during the initial set-up and to continue adjusting them during the test drive – without using CEMOS for Tractors. They could also adjust the internal tyre pressure using the integrated Claas CTIC 2800 tyre pressure control system. All drivers adjusted the settings until they achieved what they considered optimum performance.

Then all the test drives were repeated, but with CEMOS for Tractors activated. This time the drivers confirmed the suggestions for optimisation that they judged to be appropriate or requested alternative suggestions from CEMOS for Tractors.

On successful completion of the test drives, the recorded values were analysed and evaluated at the DLG Test Centre. Values recorded for all drivers from the variants with and without CEMOS for Tractors were compared and averaged to give an overall rating. The results: CEMOS went way beyond the mere effect of a tyre pressure control system: it was able to reduce diesel consumption by up to 16.8% and at the same time increase the area output by up to 16.3% for 80% of the operators. If you extrapolate the fuel consumption figures over 3000 operating hours of tillage, a large tractor with a diesel consumption rate of 50 l/h without CEMOS for Tractors and 41.6 l/h with it could save up to 25,200 litres of diesel and 67,000 kg $CO_2$! In addition, by increasing area output, the hours worked by the farmer or contractor are reduced by up to 490, which is equivalent to almost 50 working days.

# NEW CORDLESS EARTH AUGER

**Leading power tool manufacturer, Makita UK has announced the release of its Brushless LXT 36V (18Vx2) DDG460 – Earth Auger. Suitable for a variety of earth boring tasks up to 200mm diameter, this powerful tool is breaking new ground in the field of cordless solutions.**

Powered by two 18V LXT lithium-ion batteries, the new DDG460T2X7 (with two 5Ah batteries and twin-port fast charger) and DDG460ZX7 (body only version) Cordless Earth Auger is capable of producing a maximum torque of 136Nm. Thanks to its 36V brushless motor, the solution is suited for even the most demanding tasks with the ability to drill approximately 155 holes with a 150mm earth auger, and 90 holes with a 200mm earth auger all from a single charge (figures may vary depending on ground conditions.)

The tool incorporates a number of features to protect the tool and battery from potential over use, including Makita's integrated Automatic Torque Drive Technology (ADT) that automatically changes the drilling speed according to the load condition, thus enabling more optimum operation.

To protect the operator, the tool also features a torque limiter, that will activate if the auger binds in the ground, which is required due to the high torque output generated by this machine. Here, the motor will disengage from the output shaft and the machine will stop. Should an auger bit jam in soil with high resistance such as clay, the reversing switch enables the operator to extract the bit in reverse rotation. Makita has also included a Handle Set with a bar and auxiliary handle to assist the operator in controlling the rotation torque generated by the powerful motor and gearbox.

With a number of convenient controls such as soft-start function, an electric brake two-speed gearbox and variable speed control, the DDG460 can easily switch between tasks with its versatile auger bit adapter, whilst the twin LED job light makes working in low-light environments far easier.

The power unit can be fitted with a selection of 100mm, 150mm and 200mm earth augers and Makita has also introduced a 540mm extension bar to achieve greater hole depth when required.

# PRODUCTS MORE ACCESSIBLE

**Fleming Agri are pleased to announce that they have launched a new, updated website www.fleming-agri.com. Due to the global pandemic, Fleming Agri were unable to attend trade shows this year so they decided to update their website and make their products more accessible for dealers and customers.**

The new website has a clear, engaging homepage with the 3 most popular sections easily accessible with clear buttons. The products are split into the Compact range and the Agricultural range for ease of access with relevant photos. Their is also a full drop-down product section which takes the user straight to the product required.

The parts section is also easy to access from the homepage, with over 1200 parts available and many that are compatible with other brands as well. All parts can be ordered and paid for online for delivery. All parts books are available on the download section so you can be sure you are getting the right part.

Fleming Agri have launched a new merchandise section on the website as well, which is easily accessed under the products drop down menu. The merchandise can be ordered and processed through the online store.

The new find a dealer section now has a live map, showing the full global network of dealers, with the option of getting directions to your nearest dealer.

Fleming Agri have worked with a local web design company WebsiteNI to create an inventive, quality website, that clearly displays our product range.

Farm Machinery welcomes renowned antique tractor expert Peter Love, the joint creator of Tractor & Machinery and Classic Tractor, among other magazines, to its pages. Born in Paddock Wood, Kent he escaped to East Sussex with his wife Jayne 30 years ago. Each month he will look at what's going on in the agricultural preservation scene.

If you have a story, or an event, please do get in touch:

# HISTORIC VEHICLE IMPORT TARIFFS

**The HMRC (Her Majesty's Revenue & Customs) historic vehicle import duty is to stay the same for anything in this sector (over 30 years old) after Brexit on 1 January 2021 says Peter Love.**

The BTI (Binding Tariff Information) document No. 9705 states that any historic vehicle over 30 years old, which is original and not carrying substantial modifications but can be repaired or in restored condition, is all acceptable in the No. 9705 criteria. There is a proviso that the tractor is kept in original style and is historically correct, then there is no duty liable. However, there is still VAT to pay on imported historic vehicles and that is still set at 5% on the purchase price and it's not to be changed in the foreseeable future, from our understanding of things.

There has been a suggestion that spare parts will be higher priced from the EU and America after Brexit, nevertheless we are told the duty and shipping will remain the same. As we know from personal experience, imported parts from the USA have risen sharply in 2020, compared to previous years, so be warned. The whole situation isn't helped by Covid-19 of course.

In fact, shipping from the USA has rather gone to pieces in more ways than one over the past year and I cannot see any improvement for the foreseeable future, so do always allow more time for the parts to arrive here. So there you have it, things are to be kept the same from what we have been told at this stage. If there are to be any changes, we will keep you informed.

Do remember when you buy a tractor that has clearly been imported into the country; make sure the duty has been paid on it before you buy it. There again, if you are at an auction and not sure, be prepared to pay the duty when you go to license the tractor, because HMRC will be after you! It's certainly best to find out from the auctioneers if there is a duty certificate with the tractor, if you know it has been imported into the UK.

## SALES

**COVID-19**
**At the time of going to press there is uncertainty about outdoor sales taking place over the next few months, due to coronavirus, but some online sales are still planned. Please check in advance.**

**8 to 17 January Online Timed Auction.** South West Collective Sale of Tractors, Vehicles, Agricultural, Horticultural & Building Related Machinery, Implements & Equipment. **www.stags.co.uk/pages/online-auctions TEL: 01769 572042.**

# CHEFFINS SELL £48 MILLION-WORTH OF SECOND HAND MACHINERY IN 2020

The African market has been 'red' hot for Cheffins this year and on 7 December this Massey Ferguson 265 sold for £8,000 plus VAT

**Cheffins, who conduct the largest monthly sale of tractors and agricultural machinery in the world, has sold second hand agricultural machinery worth over £48m throughout 2020, at the monthly collective auctions, on site and through the regular vintage sales, despite Covid-19 and Brexit.**

They have sold over 4,500 tractors and plant items throughout the year at the monthly Cambridge Machinery Auctions, with sales to over 30 countries worldwide, amounting to an enormous £35m. Highlights of the Cambridge Machinery Sales in 2020 include a 2016 plate JCB 4220 Fastrac, 25 year limited edition, with 6,207 hours sold for a thumping £75,000. This was followed by a 2017 Case CVX 185 £69,000 and a 2016 Case Magnum CXV340RT with 4,250 hours which made £68,000.

Bill Pepper, Cambridge Machinery Sales manager and Cheffins director said: "There was a pause in live auctions at the start of the Covid-19 outbreak, meaning that sales were offered solely online until September when we reopened the gates of the sale ground.

However, we were gladdened by the spirit of online bidding throughout the summer months which still saw excellent prices paid for second hand tractors and plant items. In fact, the online only sales had parity to live auctions in terms of totals generated throughout the summer months. With total sales at the monthly machinery auctions reaching over £35m, it shows there is clearly a strong demand for good quality second hand kit from across the world.

Whilst uncertainty remains around farm subsidies, export and trade legalities in the post Brexit transitional months, we have seen that both dealers and end users are still coming to the Cheffins sales to snap up the best equipment on offer.

Similarly, the outbreak of Covid-19 had little effect on the export market, with sales to over 30 different countries across Europe, the Middle East and Asia. Some of the strongest markets in recent months have been Spain and Germany for the newer tractors and plant machinery on offer. However the Sudanese market has made a welcome comeback this year and has been a driver in the high prices paid for some of the older tractors, Massey Fergusons in particular."

"With sales totals increasing regularly, we can really see that both the UK and export market for second hand machinery is booming. The cocktail of rising prices for new tractors, lack of new tractor registrations, a shortage of stock for dealers and a drop in trade-ins has really brought the UK dealers back to our market. This, combined with the export trade making the most of a drop in the pound, has led to UK buyers vying against the foreign buyers and has in turn pushed up prices. We have also had a number of farmers entering stock to be sold as they see auction as the best way to achieve the highest prices for stock."

Cheffins nationwide on site sales have also had stellar results across 2020. There have been 28 held by them. This amounted to over 6,000 vintage and modern machinery items sold to a total value of over £10m. On site sales have incorporated a mix of end user and dealer buyers from across the UK, as well as overseas purchasers from multiple countries.

The sales have included everything from high value on site vintage auctions to smaller, dispersal sales for farmers and dealers on a national basis, taking place in Somerset, Lincolnshire, Lancashire, Bedfordshire, Greater London and throughout the Eastern region.

The highlight of the on site calendar was the major dispersal sale on behalf of KS Coles Ltd, a market-leading vegetable grower in Somerset which saw 600 lots of tractors and vegetable growing equipment in September.

Some notable prices for on site sales in 2020 include £113,775 for a 2019 Fendt 724 Vario at the KS Coles sale; £111,725 for a 2013 Claas Lexion 770TT combine at the Kendall & Banks sale in Sandy, Bedfordshire and £109,162 for a 2013 Case IH 450 Quadtrac tractor at the Edwards sale hosted in Lamberhurst, Kent.

Social distancing measures, as a result of the coronavirus pandemic, have also led to a significant uptick in the number of timed online sales hosted by Cheffins. These sales have proved as effective for sellers as traditional live auctions and helped to ensure a consistent level of second hand machinery being offered to the market.

Oliver Godfrey, Director, Cheffins added: "Uncertainty around the agricultural industry and a disappointing harvest, has seen many farmers look to dispose of unwanted kit as part of their forward planning. This, combined with the growth of the larger contract farming businesses, has ensured a reliable level of supply and demand throughout the year, helping to keep prices firm for the best machinery on offer.

It can be expected that as the Agriculture Bill finally gets ironed out and the future of subsidies becomes clearer that we may well see an increase in dispersal sales, however with sterling still weak against the Euro, we would expect to see prices remain firm as European markets look to make the most of the quality second hand machinery available."

FASTRAC
JCB

The 2016 plate JCB 4220 Fastrac, 25-year limited edition, with 6,207 hours sold for a thumping £75,000.

# CHEFFINS PREDICT VINTAGE VALUES TO INCREASE IN 2021

Things have been flying high for Cheffins in 2020.

Some £14,250 was paid for this original style Massey Ferguson 188 with Twose hedge cutter in July.

Top in the classic draw for Cheffins this year is the 1990 Mercedes MB-trac at £70,250 + VAT.

Highest priced Ford 700 sold this year was this £25,500 example.

**In 2020 over 3,200 vintage items were sold under the hammer via both online sales and at the regular Vintage Collective auctions at Cheffins' Saleground at Sutton, Cambridgeshire, which took place in July and October in 2020. The gross sales for classic machinery totalled a vast £3.5m. It saw Cheffins offer 380 classic and vintage tractors, 75 motorcycles, classic commercials and over 500 automobilia items from the summer to December. There were also nine timed online sales throughout the year.**

Highlights of the vintage sales in 2020 included the Irish owned original grade 3 1979 County 1474 short nose which achieved £74,000 at the on-site sale for Malcolm Beaton in Somerset. The Cambridge Vintage Sale in July also saw some spectacular prices with £70,250 +VAT paid for a 1990 MB Trac 1100 tractor and £53,000 paid for the 1917 Saunderson at Sutton.

The regular collective sales at Cheffins saw impressive sums paid for vintage and collectors' items. The July auction was the first timed online vintage sale offered by the firm, which grossed over £900,000 and in October the sale grossed £1.2m.

William King, Cheffins MD said: "Whilst the Covid-19 outbreak meant that we couldn't host live auctions in the first half of the year, the results achieved at the timed online collective sale in July is indicative of the demand for good quality vintage items. Our timed online sales are also increasing in regularity as both buyers and sellers become increasingly confident with the online format. We were pleased to be able to welcome live bidding in the October sale and are hopeful 2021 will allow us to continue to offer visitors to Sutton, whilst of course following Government guidelines.

"This is a market which has been unaffected by the political or economic landscape, unlike many other asset classes and vintage items continue to be hugely lucrative with values increasing year-on-year. With this in mind, we forecast that vintage prices will increase throughout 2021 as the market continues to gain momentum and we also expect to see a growth in both timed online sales and also on site auctions as collectors come to appreciate these as one of the best ways to market vintage items."

# BLUEBELL VINEYARD CHRISTMAS FAYRE VEHICLE DAY A GREAT SUCCESS

**Set amidst bluebell-strewn woods, from where the vineyard derives its name, Bluebell Vineyard Estates is a family-run vineyard and winery. The owners say it has a passion for producing world class still and sparkling wines. It's based 1.5 miles from the Bluebell Railway, which was running steam trains on Saturday 12 December and could be seen from the impressive vineyard, says our correspondent.**

Established on the site of a former pig farm, the transition from swine to vine, began as a hobby: Once home to Large Whites, Landrace and Blue Cross pigs, the site is now home to over 100,000 vines growing premium quality Chardonnay, Pinot Noir, and Pinot Meunier vines, along with Seyval Blanc, Bacchus, Ortega, Chasselas and Merlot.

Since their first plantings in 2005, the vineyard has more than doubled in size and they now have nearly 100 acres under-vine stretching across East and West Sussex.

Bluebell Vineyard, craft their own wines using the traditional method of production and strive to produce wines with the perfect balance of fruit character, acidity and ageing. All Bluebell wines are vintage wines, that is to say they are made exclusively from grapes grown in a single year. This means that every 'Hindleap' and 'Ashdown Vintage' is unique and they have won 60 National and International awards in just five years.

As a garden centre this event could take place, as the area is in Covid-19 Tier 2 regulations and was certainly popular, with the punters taking in this event until 4pm, after which it became exhibitors only.

It was staged by the impressive Chailey Classic & Vintage Tractor Club, who are certainly going places, with assistance from members of the Sussex Steam Engine Club, Claude Jessett Trust, SEVAC and members of the Burgess Hill Classic Vehicle Club (wealdclassicclub@gmail.com).

The objective was to raise money for local charities, as the Chailey Club do every year, particularly raising £1,000s for the local St Peter & St James Hospice, Haywards Heath from their Christmas events in recent years.

There were some 30 classic and vintage cars on show, joined by a smattering of commercial vehicles, along with some 34 tractors. The oldest being a 1932 International 10/20 with its famous 'ball bearing' main crank, the second most popular tractor sold in the UK in the 1930s.

It was wonderful to see Howard Ventners (Chailey Club chairman) rare Allis Chalmers A p/p here, which runs so well and is nothing but a huge monster, even if this model was a 'white elephant' for Allis-Chalmers. However, they were good threshing tractors, particularly in Cheshire, with Barlows who replaced a Foden traction engine with an 'A'. Other excellent tractors came from Fordson, Ferguson, John Deere and County to be seen in some numbers and conditions here, which the punters were very pleased to see and enjoy.

There was a marquee full of Christmas related goodies, as well as some good cheese and wine tasting and all traders reported good business by the end of the day. With the cafeteria building not operating because of Covid-19 restrictions, in the afternoon Adrian and David Vaughan gave an interesting talk covering Tinkers Park and the vintage vehicle scene in Sussex. They were followed by Phil Hart of Plumpton College and chairman of the South of England Hedge Laying Society, who spoke about the rural craft of hedge laying across the nation.

It was great to see three steamers here and it was appreciated by all, with Adrian Vaughan bringing over the lovely and smartly turned out 1920 Burrell Gold Medal No. 3851 The Tinker from the Jessett Trust, along with 1913 Aveling & Porter showman's tractor No. 7899 Southern Queen.

All in all everyone was very sensible over the Covid-19 situation and enjoyed the event thoroughly at this excellent venue, which has great potential for the future that's for sure.

THE CLAUDE JESSETT COLLECTION

1913 Aveling & Porter Southern Queen arrives; the very pleasant driver had the curtsey to apologize to the organisers for being just 10 minutes late!

Rare to see and in going order, Howard Ventners 1938 Allis-Chalmers A model, a big threshing tractor.

Great to see a number of Howard Ventners flock of sheep including 'Big Boy' the 'naughty' ram, who you would not like to mess around with!

Punters enjoy some of the tractors at Bluebell Vineyard with Howard Ventners styled 1947 John Deere AR to the fore.

The 1966 Pre-Force County 654 Super-4 stands by the lake with the immaculate and well kept vines all in place behind.

# WrightsBrokerService

## The safe and reliable way to buy and sell machinery and equipment

**Wrights Farming Register offers farmers and contractors a unique service through its team of brokers. They are the 'men in the middle' who give an impartial opinion on the items of machinery they handle on behalf of their clients. The brokers, who currently cover an area stretching from the Scottish borders to the South Coast, can save farmers time and money when it comes to buying or selling anything from a combine harvester to a cattle trough. In these security-conscious days, they also provide a discreet alternative to a public farm dispersal sale and can help farmers avoid the tax pitfalls these can cause.**

CEAT SPECIALTY HARD WORKING TYRES CTR 7 YEAR WARRANTY

The Radial Range

Designed to ensure you get the Power of C-T-R, i.e. Low compaction, High Traction and High Road-ability. Aimed to give you an all-round performance and peace of mind. Due to their flexible sidewalls, superior construction, higher tread arc width & higher inner tyre volume, our radial tyres help reduce soil compaction. Their dual lug angle design with more lug overlap gives it superior traction and better roadabilty.

The Bias range

The high traction farm & agriculture vehicle front and rear bias tyres are developed for mighty performance over hard and black soil for sturdy crop that leaves behind strong stubbles. Properties of self-cleaning, improved puncture resistance and longer tyre life assures farmers of a tension free usage. Working on fields across the world, our Bias tyres come in 4 ranges to suit different terrains.
